Higher Education Housing

FOLIO

Built space is a key part of the campus experience. Students want the spaces where they live/work/play to feel comfortable and engaging, which makes on-campus housing an ideal target for design updates.

This FOLIO from the Interface Design Studio illustrates how our modular flooring—carpet tile, LVT, and nora[®] rubber—works together to support facility goals in a variety of student spaces.

Here's what you'll find as you flip through this FOLIO:

- An inspirational product palette
- Floor design ideas
- Rendered and finished floor plans

Follow the process from start to finish with a suite of products designed for elevated aesthetics and performance.

Interface Design Studio

Do you need planning support? Looking for a design partner who understands built space branding and wayfinding? The Interface Design Studio is a fully complementary solution that can help at any point in the process. With a deep knowledge of Interface products, our team of trained concept designers focuses on the foundation of every design project—the floor.

Carbon Neutral Floors™

When you choose Interface flooring, you're fostering a more sustainable environment to promote learning. This is because all of the flooring products that we sell—carpet tile, LVT, and nora rubber—are carbon neutral. And through our ReEntry® program, Interface reclaims used carpet tile and LVT to turn into new flooring over and over again.
