

# Skinny Planks

Interface®

# Unlimited Possibilities

---

Our 25 x 100 cm Skinny Planks bring a different proportion and scale to carpet tile, expanding the range of installation options beyond what's possible with squares alone.

Squares are still a core element of the Interface modular carpet system but Planks break with the traditional carpet tile aesthetic and expand our modular platform, giving you new power to create fresh, exciting floor designs.

# **A more expressive** visual vocabulary

---

The scale and directionality of Skinny Planks gives you an expanded range of design options.

Create floors that better reflect the geometry and flow of surrounding space. Use contrasting Skinny Planks to create large scale tile patterns, provide wayfinding cues, or denote activity zones. And those ideas are just the beginning.

# Aesthetic and practical **benefits**

---

Love the look of wood plank flooring? Patterns – like herringbone or ashlar – make them appealing. Skinny Planks offer you the same patterning possibilities.

You also get flooring that's soft, quiet, slip-resistant and much more economical than a hard surface. And, Skinny Planks installed without glue using our TacTiles® installation system are more adaptable than hard surfaces.

The high percentage of recycled content and the multiple recycling options make our products more sustainable as well.

# A **flawless** character

---

Want the benefits of carpet tile  
without the look of carpet tile?  
Use a single style of Skinny  
Planks, laid in an ashlar pattern.

They'll blend across the floor,  
giving you the benefits of  
modularity and the continuous  
look of broadloom.

# Our tiles all **work together**

---

Besides 25 x 100 cm Skinny Planks, the Interface system includes 50 x 50 cm squares. The geometry works perfectly when combining them, establishing a carpet tile design platform with unparalleled possibilities.

# Concept **Design**

---

We often say modular carpet offers infinite design possibilities. You can choose from different formats, colours and patterns. But how do you design the right floor?

Our Concept Design team can help. They create visualisations in 2D and 3D, and provide your installer with a design guide to make installation easy and quick. We will help you to bring your creative design vision to life.
