DESIGN YOUR FLOOR!

F

E

D

C

B

A

This isn't your average carpet tile collection. These three styles – Lofty™, Edgy™ and Steady™ – are more like textured building blocks or puzzle pieces. When fit together properly, they create a beautiful, progressively textured floor.

Progression is key because the texture and pattern build to create visual interest. Steady's low profile lines up with Edgy's low profile side and then elevates to Lofty's sculptured patterning. Create continuous transitions along a corridor or feature Lofty as an inset area rug in larger, open spaces. With nine pattern combinations, multiple sizes and 12 colors to create your custom color, Over the Edge will fit your space perfectly.

DESIGN YOUR FLOOR!

Push the edges of your imagination with your own blend of color, pattern and size.

1.

PRODUCT Lofty
50cm & 1m

PRODUCT Edgy
50cm & 50cm x 1m

PRODUCT Steady
50cm

Select a product - Lofty, Edgy or Steady - and one of the nine Over the Edge pattern combinations. If you're using Lofty or Edgy, you'll also need to select a tile size.

2.

Each colorway of Over the Edge uses 12 colors from the Monochrome palette. The patterning and textural variations make this one a little more complex to color, so work with your rep to find the perfect combination of shades for your design. The key below demonstrates how these particular colors appear in a final design.

PRODUCT Lofty (*Highest Pile*)

PRODUCT Edgy (*High and Low Pile*)

PRODUCT Steady (*Lowest Pile*)

3.

When you have selected your patterns, contact your rep to assist with the perfect coloration and samples for your project.

The plush one, Lofty's sculptured face incorporates high and low loops for texture you can see and feel.

Aptly named, Edgy features Lofty's highly textured design side by side with Steady's low profile simplicity. Aligning its low profile side to Steady and its textured side to Lofty, Edgy is THE transition from one style to the next.

WHY MODULAR CARPET TILE?

Flexibility

Keep Your Floor Beautiful. Modular carpet tile allows you to play with pattern and design without having to special order carpet sizes. And the same flexibility that lets you create your floor helps you keep it looking good because in-house staff can easily replace individual tiles that become damaged or heavily soiled—no down time or outside contractors required.

TacTiles®

No Glue Installation. Installation or reconfiguration with our glue-free TacTiles installation system means there's no glue smell and no drying time. Guests can use the room as soon as the last piece is laid and all they'll notice is a beautiful floor.

Intersept®

Mold Protection. No matter what's spilled on the floor, our proprietary preservative, Intersept, protects our modular carpet against the growth of odor-causing bacteria—guaranteed. With proper maintenance Intersept treated carpet safely and effectively inhibits the growth of mold and other bacteria so your floors are always fresh.

Sustainable Choice

Environmental Responsibility. Interface was the industry's first to earn an EPD (Environmental Product Declaration), which evaluates consistent factors based on full lifecycle assessment (LCA). In addition, all of our products with GlasBac®, GlasBacRE and NexStep® backings meet NSF/ANSI 140 Sustainable Assessment for Carpet.

Less Waste

Save Money. Interface Hospitality's modular carpet tiles install with just 3-4% waste - and as little as 1.5% for i2(R) non directional styles - compared to an average 14% for traditional roll carpet. And our i2 styles are mergeable so tiles from multiple dye lots will always blend, even when selectively replaced years later.

cool carpet™

Cool Carpet™

Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet.

Sustainable Assessment for Carpet

The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus

An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

Environmental Product Declaration (EPD)

A statement of product ingredients and environmental impacts over the entire lifecycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and the LCA must be third party verified.
