POP™

*Shift between spaces.
From the staccato of
a busy hallway to a
bold stripe of colour that
directs and delights,
floors signal something
new. When the right
foundation is in place,
floors are a visual cue.*

Interface®

We named our first edition of POP 'SHIFT', because that's exactly what it does. Bold stripes of colour that guide. Clever placement that positions. When the right floor is in place, a shift makes sense.

Every space makes an impact. POP encourages a shift from one space to another. Positively, and confidently.

Smart floor design signals a change, creates an edge, and subtly steers people in the right direction. POP2 has carpet and LVT floors that spark solutions and inspire you to make the most of any space.

POP delivers better products fast, so you can create positive spaces at speed. Explore fresh design with our newest products. Browse styles, colours, materials, and patterns. See something you like? It can be underfoot before you know it.

Most POP products are available to ship in 10 business days. That's a lot to be positive about.

Find even more at interface.com/pop.
