

+ Positive spaces™

THE CATALOGUE 2020

Featuring thousands
of better products.
**All available to
order today!**

Interface®

WE KNOW YOUR FLOORING'S
IMPACT ON GLOBAL WARMING.
THAT'S WHY ALL OUR PRODUCTS
ARE NOW CARBON NEUTRAL.

Interface®

Carbon Neutral Floors™

All our products. Carbon neutral.

Every product featured in this catalogue – whether carpet tile or luxury vinyl tile (LVT) – is carbon neutral.

We achieved this over two decades of work reducing the carbon footprint of our products combined with purchasing verified carbon offsets to make up the difference. All at no extra cost to our customers.

Since 1996, we have reduced the greenhouse gas emissions from our manufacturing by 96 per cent and the average carbon footprint of our carpet tiles by 69 per cent – the lowest in the industry. While we continue to reduce our emissions and work towards our goal of becoming carbon negative by 2040, offering Carbon Neutral Floors represents a key milestone in our journey. Global warming impacts all of us. Choose Carbon Neutral Floors and lower your carbon footprint with one positive step.

+Positive spaces™

Better products. Happier people. Healthier planet.

Look Both Ways. Where design forces combine.

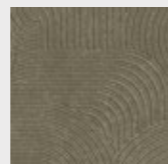

Look Both Ways™ pairs Interface LVT and carpet in one, contemporary collection.

Playful patterns and urban textures blend seamlessly in a series of striking combinations. Concrete and confetti. Heavy and light. Plush and flat.

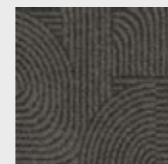

It's high design without the footprint, as all of our products are carbon neutral. Create **+Positive spaces™** and create an impact in more ways than one.

Interface®

Interface®

+Positive spaces™

Better products. Happier people. Healthier planet.

We've always had a positive attitude.

Because creating the best product in the world isn't easy. We challenge ourselves to be better, think differently and develop products that have a positive impact on people's lives, their spaces and our planet.

Which means there's always work to be done, and undone. Rules to be made, and broken. Success and failure. But it's worth it. Because when we succeed we help change the lives of everyone using our products, as well as many who don't.

People crave control of the environments in which they live, work and learn. At Interface, people's needs are our priority. That's why our modular flooring system creates connected, integrated solutions that offer flexibility and functionality with aesthetics to fit any style.

From our wide portfolio of carpet tile and modular resilient flooring our system allows you to create +Positive spaces™ that will delight of your customers.

Look Both Ways

Some things work better in pairs. Inspired by composite ground materials, Look Both Ways™ combines hard and soft flooring with intentional design in one cohesive collection. Playful patterns and urban textures blend seamlessly in a series of striking combinations. Concrete and confetti. Plush and flat. Carpet and LVT.

Look Both Ways tiles can be mixed to create exciting floor designs that embrace the unexpected. Concrete textures are reimagined as plush carpet and mimicked on smooth LVT in simple, solid forms. Patterns marry deco carvings with the lightness and joy of confetti. Mineral based colors are highlighted with subtle metallic flecks and varying infusions of vibrant color.

Aerial i2

A view of the city from above gives us the unique opportunity to witness connectivity in action; a web of links that both fascinates and assures us. In the Aerial Collection, a simple neutral palette travels new paths when several hues tangle together in each colourway, bringing this inspiration to life.

The construction of AE310™, a 50cm X 50cm square tile, recalls the warp and weft of a hand-woven textile. AE312™ adds strands of color to light up that texture. AE311™ and AE313™, 25cm X 100cm Skinny Planks™, bring a more painterly movement to the collection, like brush strokes across the floor with AE313 introducing a subtle wash of colors to the neutral base of AE311.

AE315 Mushroom Grass

Aerial Flying Colours ⁱ²

Part of our Aerial Collection, Aerial Flying Colours features our widest range of colours to date—from natural, neutral hues to bold, eye-catching shades and everything in between. Creating a multitude of options to work across markets, Aerial Flying Colours breathes new life into our i2[®] product category by expanding its colour spectrum. Each i2 tile varies in colouring and patterning within one style and colourway so that tiles blend together no matter when they are purchased or installed.

Aerial Flying Colours introduces two more styles to the Aerial Planks offering—AE315™ and AE317™. Use AE315™ to blend a spray of colour to a neutral ground, creating that signature Interface transition tile, or cast a soft hue across the entire floor. Use AE317™ to make a bold leap with a vibrant, mixed-hue approach to each colourway.

Bike Path

Bike Path delivers a range of eight colours across two Skinny Plank style lines. BP410 is a solid-colour linear product while BP411 features the same base tones complemented with specially chosen single-colour accents. Colour stripes run in varying degrees between tiles, from sparsely distributed to heavily accented, creating a dynamic effect across the floor.

BP410

Product Construction Tufted Loop Pile
 Yarn/Fibre BCF Nylon Type 6.6 - Recycled Content
 Machine Gauge 12th Gauge
 Pile Thickness 2.0mm
 Total Thickness 5.5mm
 Tile Size 25cm X 100cm
 Area of Use Commercial - Heavy Duty
 Total Recycled Content 45-57%

Installation Methods Ashlar Herringbone

BP411

Product Construction Tufted Loop Pile
 Yarn/Fibre BCF Nylon Type 6.6 - Recycled Content
 Machine Gauge 12th Gauge
 Pile Thickness 2.0mm
 Total Thickness 5.5mm
 Tile Size 25cm X 100cm
 Area of Use Commercial - Heavy Duty
 Total Recycled Content 45-57%

Installation Methods Ashlar Herringbone

Biosphere Brushed Hues Azure

Biosphere

Zoom out. Way out, to the very edge of Earth's reach. Look down from that perspective, and what you see, is a fusion of blurred edges. Colours, on this planetary scale, blend and fade beautifully as only nature can. Indigenous transitions of the layers between ocean and land, the gradations of low to highlands and the tonal shifts from mountain ranges towards ever changing skies.

The biosphere supports every aspect of life on Earth. Covering each continent, merging all regions and nations into one. Discerning no man-made edges, continuously working over aeons of time. These subtle washes of tone, colouring the amazing contrasts of land, ocean and sky, inspired our latest collection, Biosphere. Like breathtaking views from the far edges of the earth, its textures merge with subtle layering effects. By adding a beautiful range of colour variation, Biosphere captures nature's most inspiring elements.

POP

Shift

Ideas About Floors

Interface®

Shift between spaces

From the staccato of a busy hallway to a bold stripe of colour that directs and delights, floors signal something new. When the right foundation is in place, floors are a visual cue.

We named our first edition of POP 'SHIFT', because that's exactly what it does. Bold stripes of colour that guide. Clever placement that positions. When the right floor is in place, a shift makes sense.

Every space makes an impact. POP encourages a shift from one space to another. Positively, and confidently.

Smart floor design signals a change, creates an edge, and subtly steers people in the right direction. POP2 has carpet and LVT floors that spark solutions and inspire you to make the most of any space.

POP delivers better products fast, so you can create positive spaces at speed. Explore fresh design with our newest products. Browse styles, colours, materials, and patterns. See something you like? It can be underfoot before you know it.

Most POP products are available to ship in 10 business days. That's a lot to be positive about.

Find even more at interface.com/POP

Colour Me

The extravagance of colour comes across in this line adding a coat of vibrancy to the world of black and white. Available in 16oz and 24oz.

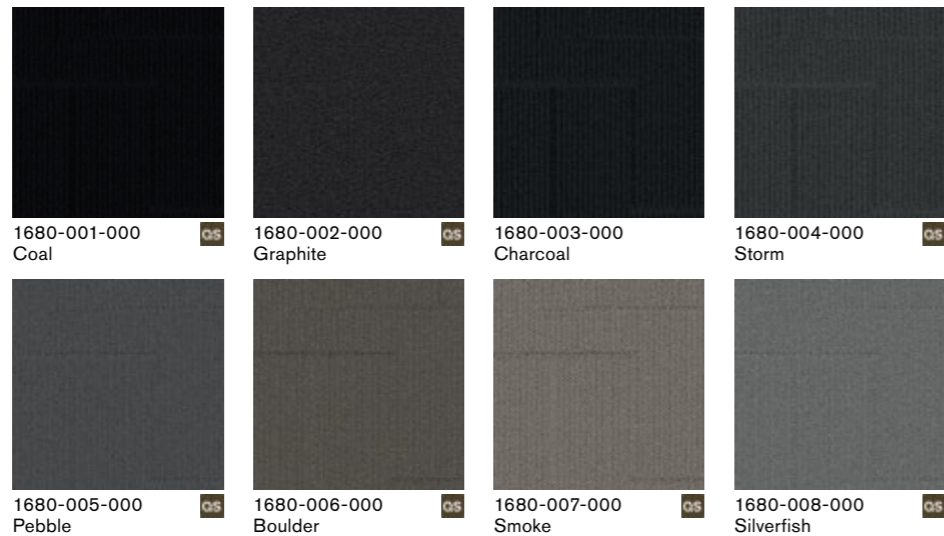

Colour Me 16oz

Product Construction Tufted Textured Tip Sheared Loop
 Yarn/Fibre BCF Nylon Type 6 - 100% Recycled content
 Machine Gauge 12th Gauge
 Pile Thickness 2.5mm

Composure Reserved

Composure

Surrounded by distractions we lose our ability to connect and focus. Nature restores our sense of calm and helps us feel more grounded. Inspired by natural rock formations, Composure creates a tranquil, comfortable platform in a choice of 7 natural shades. It has been designed with an organic, non directional flexibility to flow through large areas with ease.

Detours and Detours Ahead

Straight and direct, main roads are a dull way forward. Go against the flow, refuse to conform and take a "road less travelled" instead. It always leads to very interesting journeys.

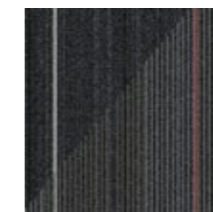

Detours™ and Detours Ahead™ send our familiar 50cm squares in all new directions. Relying on a classic neutral palette, both styles explore an alternative route to bringing visual movement for floors. Bold, angular patterns make it appear as though they are moving multi-directionally. Activating every floor design in energetic, surprising ways.

Pattern plays across tonal surfaces via streams of light and shadows in Detours Ahead™, with flickers of bright color added to highlight, in Detours™. Don't stop at routine. Choose new routes to discover simple ways of creating amazing destinations via this exciting collection.

Fading Tracks

Just like a mixing studio that creates tracks by weaving together riffs and notes, instruments and vocals to offer unlimited musical possibilities, Fading Tracks delivers seemingly endless design options which harmonise perfectly with any space.

Fading Tracks is a unique flooring solution in its category. That's because it is a design-driven system which facilitates dispersed transitions, enabling areas of flooring to segue subtly from one pattern to the next. Soft and organic with linear blends, the range features eight base neutral colours with specific coordinated accent colours which complement them precisely. By allowing different products to be fused together rhythmically, the product offering is capable of enhancing a truly broad spectrum of environments.

As a result, Fading Tracks delivers the ability to compose unique floors and create gentle, harmonious transitions that are always aesthetically pleasing, carbon-neutral and will transform any space into a positive space. Now, isn't that music to your ears?

Flow Drift

Flow

Motion in sports, whether explosive or controlled, is held together by a single fluid movement from start to end. This journey of motion forms the inspiration of Flow. Its strong continuous linear patterns symbolise the fluidity you may see in the slow yet controlled movements of Tai Chi, a Chinese martial art.

Flow Brights and Stripes

Dynamic linear motion, one flowing movement of travel from start to end point. You see it naturally in the powerful arc path of a gymnast or the play of light created by fireflies on a forest trail. This natural sense of a journey forwards formed the inspiration for Flow™.

Flow™ never remains static. It is moving ahead in exciting, unusual ways. Even the best can become better, forging new paths and directions. Following a natural route, the design patterns of Flow™ Brights and Stripes are the FIRST to easily adapt to BOTH square or plank formats. This mix of ultimate flexibility via subtle tone and linear shape, adds a spark of inspiration to Flow™ which simply lights-up customer creativity.

Global Change

Shadows on the forest floor. Sun darting behind clouds. Scenic coasts meeting grassy dunes. Our Global Change™ Collection is inspired by nature's transitions. Using organic patterns and linear textures, this collection draws connections between people and earth, morning and evening and dark and light.

The collection is a sophisticated interpretation of biophilic design, with a range of colours, textures and formats in both small scale and bold, graphic aesthetics. From open areas to enclosed spaces, Global Change can reinforce the purpose of a space – much like a clearing in the woods.

Based on foundational patterns and colours in a series of gradients, Global Change products are designed and intended to be mixed and matched, creating a wide range of sensory and visual experiences. In people-focused interior environments, where diversity and choice are the significant criteria for success for the user, Global Change serves as a foundation for +Positive spaces™. As a growing system, designs from Global Change may also be installed with other collections, including our Level Set™ LVT, for varied texture and style.

Human Connections

Today, we are both more connected as a society and, ironically, increasingly less connected, shielded from each other and the natural world by our screens, our cars, our homes and the buildings in which we work. But when we walk outside, our pathways reveal the importance of reconnection: the choices we make in our destinations, how we get there and the unexpected gathering places that we happen upon. Invariably we are also drawn to areas of respite where nature is present, nurtured to grow in the environment or simply there by its own persistence.

Human Connections™ is literally the intersection of the sensory cues that we seek to include in our fast paced lives, supporting the idea that the most positive spaces offer variability and choice. Eight different styles fit together in unique ways to create paths, intersections, collision zones and destinations. Sett in Stone™, Kerbstone™, Paver™ and Flagstone™ are four textures that recall the well-worn streets of the city, while Moss™ and Moss in Stone™ attach seamlessly to Sett in Stone to introduce the greenery we crave in a very organic way.

To complete the collection, we have included two highly patterned and colourful styles, Rue™ and Stone Course™, that add a lively graffiti-like impact.

Human Nature

In a world that never sleeps—where information always flows, boundaries blur, transparency reigns and the sound of silence ceases to exist—our instincts prompt us back to nature, with its subtle yet clear cues on how best to live and work. That vital, mysterious link between the nature we observe and this same nature within ourselves is the inspiration behind Interface's Human Nature™ Collection.

This collection features three different textures in 25cm X 100cm Skinny Planks. HN810, HN850 and HN840 placed in sequence blend seamlessly in an organic movement that shows no hint of tile corners or edges.

Narratives

As we connect around the world, we see our personal histories, our stories, get more and more entwined. The Narratives Collection is an elegant rendering of what this might look like — our stories taking shape in complicated layers of lines and patterns, sometimes fine and detailed, and other times broad and dramatic.

Naturally Weathered Burnt Ember / Herringbone

Naturally Weathered

Naturally Weathered brings that time-worn palette inside with 8 highly variegated neutrals that explore every aspect of the color grey in our appropriately proportioned Skinny Planks™ format. So each installation of Naturally Weathered will cover the floor in an entirely unique composition of pattern and color.

NF400 Mineral
NF401 Linen

Near & Far ¹²

NF400 studies shade and hue in striations that run the length of our 25cm X 100cm Skinny Plank. NF401 explores these ideas in greater dimensions with carving, depth, and curvilinear movements. The juxtaposition of the two set side by side awakens the edges, adding a third design element to explore.

Net Effect Collection

Net Effect One 12

Net Effect One features non-linear organic forms made from our unique tufting technology. Its patterns are inspired by the natural line where the ocean meets the shore. All three can either be used alone or in combination to create undulating organic movement across the floor. B601 features a pronounced, sculpted over-tuft pattern that subtly fades through the transition product B602 into the deep underlying colours of B603.

Net Effect Collection

Net Effect Two

Net Effect Two is the plank collection in Net Effect. Although the products in this collection have very different linear textures, they possess common elements that enable for gradual transitions or accentuated contrasts in pile height and pattern scale. B701 features a pronounced cut and loop construction, while B702 showcases a more consistent appearance with textured loops.

Nimbus Charcoal

Nimbus

We've got our heads in the clouds. We can't seem to concentrate on the conventional approach. We can't seem to just design carpet tile the regular way. This time we made it long and narrow instead of square. We blend colors in an ethereal pattern that appears to have no beginning and no end, no repeat. We create possibilities where none had been considered. Nimbus combines value with all the possibilities that come in the 25cm X 100cm skinny plank. The potential of the new format goes beyond the pattern on the tile itself, to include unique compositions combining 50cm and 50cm X 100cm tiles. Go ahead and try it – the sky's the limit.

Off Line Pewter/Cloud

Off Line

On its own Off Line presents a recurrent, banded effect with interesting variations. When paired with the bold solids from On Line, Off Line veers into a new direction by creating transitions between neutrals and brights, hard lines and soft. An installation that blends On Line and Off Line together alters our impression of its scale, toying with the point where colours blend onto each other.

On Line

On Line's simple yet classy linear patterns are inspired by the robust communication links we rely on today. A solid colour product designed for our Skinny Plank format, On Line stretches its linear patterns onto an elongated tile, presenting a wide selection of installation options that promises amazing floor designs.

Pleatwork Frizz

Pleatwork

Pleatwork is inspired by pleating, a simple technique that dates back to ancient Egypt. The appearance of fabric doubled upon itself and scrunched-up textiles are artfully illustrated in the textured loops and colour blends of Pleatwork.

Raw Loft

Raw

Raw features the unexpected beauty you find in the 'organic deconstruction' of materials. Made from our Tapestry technology, its intricate patterns emulate the random and varying tones in discoloured concrete walls and floors. This product spans a wave of eight beautiful colourways and is our very first product in Asia to use 100% non-virgin yarn.

SR999 Iron

SR999 Smoke

SR999 Iron

Step Repeat

Step Repeat offers three coordinating walk off styles designed to make the most of your entryways and other high traffic areas. The larger scale pattern of SR999™ features innovative, stiff fibers that grab dirt, moisture and debris, trapping it until it can be vacuumed up later. Interiors stay fresher, your carpet lasts longer, and there is less risk of injuries due to slips and falls.

Street Smart Walkway
Viva Ccolores Amarillo

Street Smart

It takes a certain savvy to really read the room, to know when to be bold or when to be reserved. We call it being street smart, which is also the name of our latest collection. The Street Smart Collection is a pairing of two styles that can easily handle the kinds of situations that urban life presents.

Street Smart's eight tonal neutrals lead the way with eight more colourful companions to brighten the possibilities. It's offered in our Skinny Planks™, which means it can move across the floor in really interesting ways.

UR501 Flax

Urban Retreat Collection

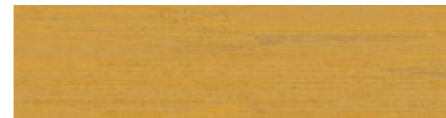

UR501

UR501 features the look of wooden boards with a tastefully weathered texture created from its varying pile height profile. A heavy tip shear creates a velour-like touch and feel to the yarns that emerge on top, giving it that fullness.

Product Construction	Tufted Tip Sheared Loop
Yarn/Fibre	BCF Nylon Type 6 - 100% Recycled content
Machine Gauge	Tapestry (Colour Point)
Pile Thickness	4.0mm
Total Thickness	8.0mm
Tile Size	25cm X 100cm

Urban Retreat Collection

Urban Retreat One

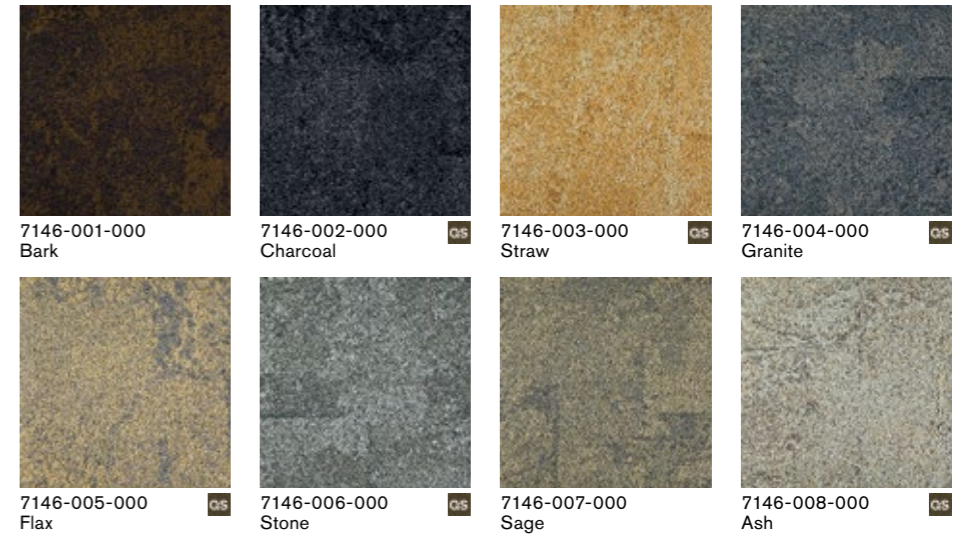

Urban Retreat One headlines this collection's theme, representing the city's blend of natural and man-made. Its three styles provide a smart fusion of colour and form that work together to recreate the beautiful transitions between these two worlds. UR101 recreates where moss gives way to granite and grass to sand, connecting the organic patterns of UR102 and UR103.

UR201 Stone

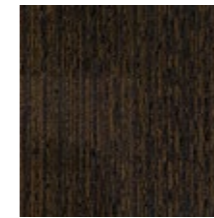

Urban Retreat Collection

Urban Retreat Two

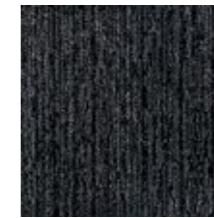

Urban Retreat Two collects the orderly with the organic in its three patterns - the eccentric texture of aged tree bark in UR201, the grid pattern of UR202 and the natural fibre pattern of UR203. Mixing these patterns accentuates their individual characteristics, revealing precisely what is special about each of them.

UR301 Stone

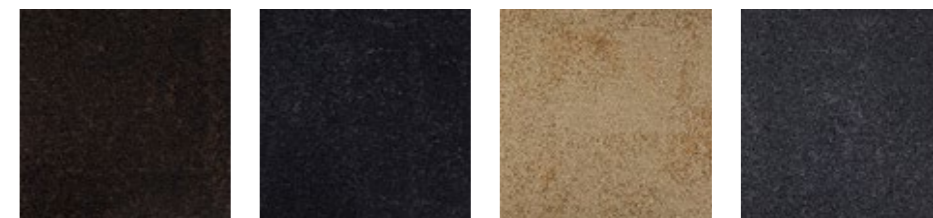

Urban Retreat Collection

Urban Retreat Three

Urban Retreat Three is a selection of refined textures that amazes with subtlety. The shifting shades of UR301 epitomise the look of natural limestone, while the shimmering linen-like UR302 provides balance with its simple look. UR303 completes this all-rounded collection with its raw, unadorned finish. Urban Retreat Three and Urban Retreat Two share the same eight hues and pair elegantly with Urban Retreat One.

Visual Code

AI, VR, robotics and smart everything. Hi-tech tools are sleek, enticing and fast, but they can be a distraction from creative thinking. Engagement with the natural world and real, “hi-touch” things like hand-crafted materials and goods, humanize experience, slow it down and restore imagination and wonder. Visual Code™ is a collection of ten different patterns inspired by the symbiotic relationship of hi-tech and hi-touch, marrying images of glitch graphics and technicolor circuitry with simple textures that recall plain woven fabrics and rugs. Based on simple textiles in shades of gray, Stitch Count™, Stitchery™ and Plain Stitch™ set the groundwork for the collection. In contrast, Hard Drive™ and Static Lines™ scramble colors, mimicking a monitor “glitch”. Bright, bold Circuit Board™ is at once precisely like wiring and vaguely like an ancient tribal motif. And finally, striking the balance are four black and white textures that recall handwoven rugs from another time and place.

Works Unite Flint

Works Stream Granite

Works Atom Russet

Works Atom Russet

Works Series Works Atom

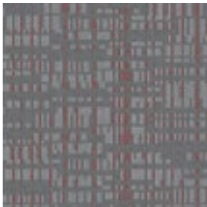

Look very closely. You will see that the true genius of large, human or natural structures, is that they are created from the tiniest elements. Like particles, the random, small patterns of Works Atom create detailed accents to capture attention. A sequence of structurally brilliant designs, each Works Atom tile works smarter to make every spatial idea come to life and inspire in unusual ways.

Works Series

Our Works Series™ has one vision, to work smarter together for every space. An exciting sequence of intelligent designs, they have the power to move people emotionally through a space. Every detail of Works Series works smarter to give greater versatility and drive value at the same time. Smart thinking on colour, texture and pattern makes Works Series work seamlessly with other Interface collections. So the flow of your ideas will never stop expanding and moving forward. Each Works Series tile will prove to be the smart move for our planet's future too. As with every Interface product, they are Carbon Neutral, so they help you lower your carbon footprint with one positive step.

Works Atom Ivory

Works Series

Works Stream

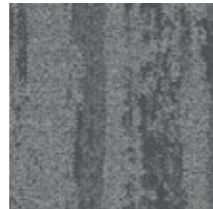

When you see bright minds working at their peak, thoughts seem to flow easily. Freed by the sparks of inspiration, greater forces appear to be at work. By inspiring free movement in a space, people will think and feel more connected. Everything flows smoothly when real collaboration is encouraged. Creating directions through flowing patterns, Works Stream is the smarter way to create quiet, comfortable spaces where the smartest thinking and work-streams can come together.

Works Unite

Naturally opposing views can create true moments of innovation. Free flowing thoughts, emerging from an ideation session, will blur all lines to really push the envelope. When such individual contributions brilliantly combine, real feelings of group unity develop. Everyone owns the idea. In a similar way, Works Unite innovatively fuses contrasting, linear and organic patterns, seamlessly merging them into a plank format. Texture is grouped with height variation to create smart, layering effects and a sense of moving forward. Works Unite is the intuitive way of creating spaces where opposites attract, beautifully.

World Woven Collection

Inspired by some of the world's most beloved woollen textiles, the World Woven™ Collection pays homage to age-old crafts, from Scottish tweed to Saori hand-weaving. The collection comprises six Skinny Planks and three square accent styles, each with eight colours and made with 100% recycled content nylon. All nine styles weave together our current predilections with memories we share of some of the most enduring textiles of the past. They are simple, elegant fabrics that keep us warm and lift our spirits.

Brushed Lines

One of the top secrets of our success is what lies beneath

At Interface, we understand the importance of a strong foundation

It's been the basis of our continual improvement upon the traditional benefits of carpet, so it's no surprise that our innovative backing systems are responsible for the enhanced performance and durability of our modular carpet tiles. They're what enable our carpet tile to resist moisture and be moved and updated with ease.

Each of our three main backing systems - GlasBac®, GlasBacRE and CushionBacRE® - provide a unique benefit, but all offer superior dimensional stability and carry a standard 15 year warranty against excessive surface wear, edge ravel, backing separation, shrinking and stretching.

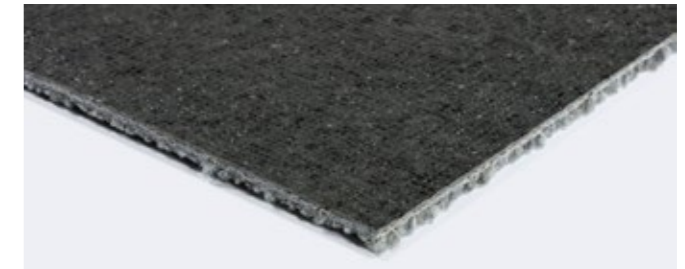

GlasBac®

Our GlasBac backing has been in production since 1973 and continues to set the industry standard. Our carpet tiles backed with GlasBac have 47-80% total recycled content (including up to 16% post-consumer recycled content).

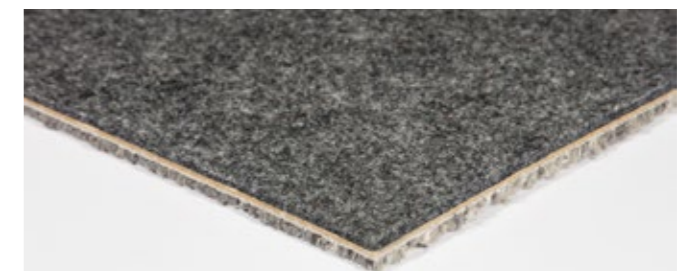

GlasBacRE

GlasBacRE is our backing system with high post-consumer recycled content. All styles backed with GlasBacRE feature 60-78% total recycled content (including up to 42% post-consumer recycled content).

CushionBacRE®

CushionBacRE is a high performance backing that delivers superior underfoot comfort. All styles backed with CushionBacRE feature 56-74% total recycled content (including up to 23% post-consumer recycled content).

Boundary Metallics

Boundary Metallics, our exclusive luxury vinyl tile design, presents a new point of view for the floor, inspired by man-made, industrial materials with the patina of nature and time. Infused with warm and cool metallics, light dances across the floor, activating it's typically static surface. Through pigment, organic pattern and texture, these Skinny Planks™ prove a more forgiving finish to scuffs and marks. Create an integrated floor of open and sheltered areas by installing Boundary Metallics and Interface carpet tiles side-by-side. Our system of hard and soft tiles in Skinny Planks and squares allow you to move from surface to surface without the need for transition strips.

Drawn Lines™ Collection

Our Drawn Lines LVT layers filament-fine marks in varying weights and rhythms, creating a prismatic geometry in an array of scales. Softly pooling areas of light and dark with no visible repeats. This product pairs beautifully with Interface's Visual Code carpet tiles.

Drawn Lines

Fractals are repeating patterns at different scales and nature's favorite pattern-making method. Following this, Drawn Lines™ layers filament-fine marks in varying weights and rhythms, creating a prismatic geometry in an array of scales. Note the detail of the never-ending pattern, a finely linear matrix with softly pooling areas of light and dark and no visible repeats. Drawn Lines is offered in 10 colors—a palette of neutrals and a few accents, sorted from warm to cool with a thread of metallic adding shimmer and depth. Combine Drawn Lines with Interface carpet tiles side by side for an integrated flooring system of hard and soft without the need for transition strips.

Level Set Collection

Hard and soft comes together in perfect unity to create a whole new world of inspired floor designs. Our LVT selections of natural and textured wood-grains and creative stones have been thoughtfully designed – they perfectly integrate, complementing the same natural inspirations seen in our extensive carpet tiles range. No matter how you arrange them, these are designed to mix and flow seamlessly together. In fact, they fit like a glove without the need for transition strips. Interface LVT is constructed from a combination of highly durable, recyclable layers. Scuffs and scratches from everyday wear are minimized by Ceramor®, a ceramic bead coating that protects the surface layer of the tile. A high performance backing layer, Sound Choice™ acts in the same way as our carpet tiles, reducing noise impact levels and delivering outstanding acoustic properties. And all these are backed by the same 15-year product warranty too. Get the best of both worlds by pairing LVT with modular carpet tiles, and say hello to harmonious, gorgeous style.

Step this Way Alba

Look Both Ways

Some things work better in pairs. Inspired by composite ground materials, Look Both Ways™ combines hard and soft flooring with intentional design in one cohesive collection. Playful patterns and urban textures blend seamlessly in a series of striking combinations. Concrete and confetti. Plush and flat. Carpet and LVT.

Look Both Ways tiles can be mixed to create exciting floor designs that embrace the unexpected. Concrete textures are reimagined as plush carpet and mimicked on smooth LVT in simple, solid forms. Patterns marry deco carvings with the lightness and joy of confetti. Mineral based colors are highlighted with subtle metallic flecks and varying infusions of vibrant color.

Studio Set

Every project is an opportunity for fresh ideas. Enter Studio Set. Thirteen hues selected to serve as your go-to source for color in LVT. Studio Set is a spectrum of colors from super-saturated brights to ideal neutrals. Take note of the very subtle woodgrain pattern, but don't get stuck in conventional solutions. These Skinny Planks™ were meant to inspire you to design with pure color, creating unique compositions or just making a singular bold choice, like a red floor. Combine Studio Set with Interface carpet tiles side-by-side for an integrated flooring system of hard and soft tiles in Skinny Planks and squares. Interface modular floors allow you to move from surface to surface without the need for transition strips.

Product Construction High Performance Luxury Vinyl Plank
Wear Layer Thickness 0.55mm
Total Thickness 4.5mm

Product Features

Carbon Neutral Floors™

We are the first global manufacturer to declare that all of the flooring products that we sell – carpet tile, luxury vinyl tile (LVT) and nora® rubber – are carbon neutral. We achieved this after more than two decades of work reducing the carbon footprint of our products combined with purchasing verified carbon offsets to make up the difference. All at no extra cost to our customers.

Intersept®

Intersept® – our patented antimicrobial inhibits up to 99% of all microbial growth. It is permanently incorporated into the primary backing of all our carpet and is guaranteed for the life of the product. It helps prevent infection, minimises odour and actively protects against bio-contaminants.

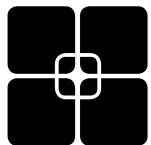

i2®

Observing the organic rhythms of a leaf-strewn forest floor inspired us to devise i2, an innovative advancement in modular carpet tile design. i2 products vary in patterning and colouring within one style and colourway, resulting in tiles that blend together no matter when they are purchased or installed. Available in both square and plank formats, many i2 products are designed to be installed in any order and orientation. This means less installation time, nearly 90% less waste than traditional broadloom carpet, and easy reclamation and recycling. As there isn't a need to worry about matching dye lots, less attic stock is required and selective replacement is even more effective.

ReEntry™

From concept to creation to the end of its useful life, we feel responsible for each carpet tile we make. ReEntry is Interface's promise to take back our customers' used flooring and create further value with them in the most sustainable way contingent on their location, composition and condition. As of 2018, we have prevented more than 6,100 tonnes of carpet from going to landfills around the globe.

TacTiles®

No Glue Installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

LVT

Interface LVT can be installed in all commercial interiors. We do not recommend installation in kitchens, bathrooms, showers, toilets, behind bars, food serving areas or any areas where fork lifts, scissor lifts or similar are used.

Environmental Accreditations

CRI Green Label Plus

The Carpet and Rug Institute (CRI)'s Green Label Plus program certifies carpet, cushions and adhesives with very low emissions of volatile organic compound (VOC) emissions, which are harmful to human health.

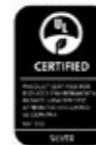

NSF/ANSI 140 – Gold Certified

NSF/ANSI 140 Sustainability Assessment for Carpet is a U.S. national standard that measures and certifies the sustainability of commercial carpets based on lifecycle assessment principles. All our carpets made in Thailand are Gold Certified.

Singapore Green Building Product (SGBP) Certification Scheme – Four ticks

The Singapore Green Building Product (SGBP) labelling scheme is recognised under the Building and Construction Authority's Green Mark scheme to accrue additional points that count towards a project's eventual rating. Interface carpet tiles and LVT have a four tick rating.

GREENGUARD Gold

Products awarded the GREENGUARD Gold Certification by UL Environment are subject to advanced dynamic environmental chamber testing, along with exposure modelling and analytical measurements, to ensure they do not contain more than stipulated levels of VOCs, formaldehyde, ozone and phthalates. Interface LVT are GREENGUARD Gold certified.

FloorScore

FloorScore is an indoor air quality (IAQ) certification standard for hard surface flooring materials, adhesives and underlayments. Jointly developed by SCS Global Services and Resilient Floor Covering Institute (RFCI), FloorScore® is recognised by building rating systems including LEED v4, WELL, BREEAM, and CHPS. Interface LVT are FloorScore certified.

All Interface manufacturing facilities in the Asia Pacific region maintain registration to ISO 9001 Quality Management Systems and ISO 14001 Environmental Management Systems.

Production specifications are subject to normal manufacturing tolerances and may be changed without notice. Slight variation in colour among different production lots are normal and should be considered in the overall installation plan. Pile Thickness & Total Thickness quoted is to within a +/-0.5mm manufacturing tolerance. Products covered by manufacturer's written warranty only. All other warranties, including without limitation any implied warranties of merchantability or fitness for particular purpose, are hereby disclaimed. Contact your representative for written warranty information. Recycled content calculations are based on historical averages by total weight of the product for backings. Yarn/Fibre recycled content calculation excludes backing. We update our recycled content information and other environmental data regularly to reflect changes and advancements in our technology.
